ParkerVision Will Host Conference Call Thursday, January 20 at 4:30 PM EST to Discuss Newly Announced Power Amplifier Strategy

JACKSONVILLE, Fla., Jan. 20 /PRNewswire-FirstCall/ -- ParkerVision, Inc., announced today that management will provide additional details regarding commercialization plans, strategic highlights, and manufacturing and technological benefits related to its newly announced digital power amplifier product lines. The conference call is scheduled to begin at 4:30 PM EST, and will consist of prepared remarks from management as well as a Q&A session. The conference call will be available over the Internet via live web cast.

ParkerVision, Inc. is headquartered in Jacksonville, Fla. with additional facilities in Orlando, Florida. The company's new RF power amplifier products provide chip and technology solutions to manufacturers of wireless RF products. The company designs, develops and manufactures complete semiconductor system solutions for wireless products based on the enabling, patented D2DTM technology. D2D, which is applicable to all wireless applications, utilizes digital radio circuitry that eliminates the negative attributes inherent to products that use legacy analog processes. Based on the superior performance of our D2D technology, ParkerVision guarantees that its SignalMAXTM complete networking solution will offer "full home coverage" and eliminate "dead-zones."
